

NEW book of Dr. med. vet. Uwe Petermann available...!

(PCLAC Pulse Controlled Acupuncture Concept in Horses and Dogs)

Dear Customer,

We have the pleasure to announce the new book of Uwe Petermann DVM. This book is a MUST for every veterinary practitioner and acupuncturist. Please follow the content in a few words:

1. The book explains the **basic principles of traditional acupuncture** (e.g. 5 Elements, 8 Principles, Co- cycle, Sheng Cycle) in an easy and understandable way.
2. **All traditional rules** as Shu- Mo- Treatment, linked Meridians (or Connected Vessels), Mother- Son- Rule, Midday- Midnight Concept and the principle of the TendoMuscular Meridians (TMM).
3. But there is as well a lot of very interesting new stuff! **Controlled Acupuncture in order to find and treat just the imbalanced (active) acupuncture points** by RAC/VAS pulse control.
4. The holistic treatment concept of integrating the **“Disturbing Focus Principle”** into acupuncture treatment .
5. The **integration of Low Level Laser Therapy (LLLT) into acupuncture treatment**. This means much more than treating acupuncture points by laser instead of needles. LLLT is a wonderful independent treatment for inflammation, spondylosis, arthrosis, for wound healing, tendon healing, etc. and easy to combine with acupuncture.
6. **Ear Acupuncture**. This has never been published before: **All ear points** of joints, the spinal column, organs like Liver, Spleen, Uterus, Kidneys etc., all pathways of each meridian on the ear and special ear points for treatment of psychic disorders are described in more than 24 different ear maps (photo quality), for horses and dogs.
7. The **scientific background of acupuncture and LLLT** is explained.
8. **PCLAC is demonstrated in more than 20 case studies** with follow up photos of the patients in nearly every field of veterinary medicine.

The book is printed in a high quality A4 hardcover version. It has 280 pages and contains 138 coloured and 59 black/white photos and graphics. The price is 78,00 € + 13,00 € as shipping flat rate, total 91,00 €.

How to get the book?
